

COATED BELTS

COURROIES AVEC REVÊTEMENT CORREAS CON RECUBRIMIENTOS

Timing belts coatings improve performance and safety in industrial transport systems.

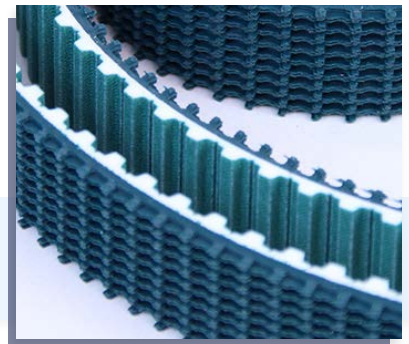

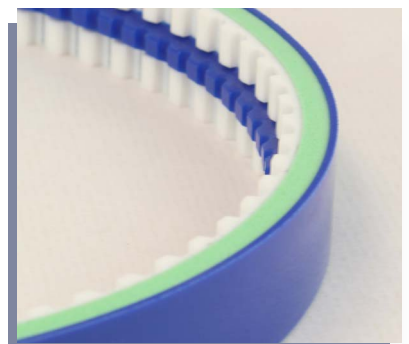

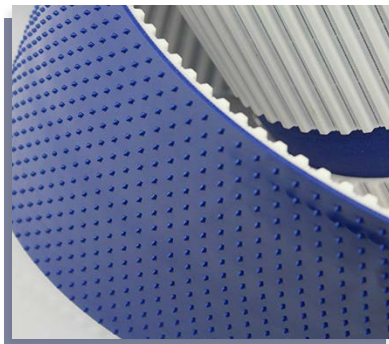

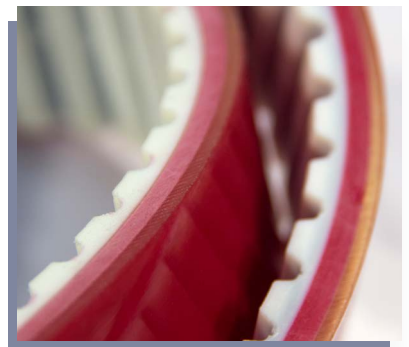

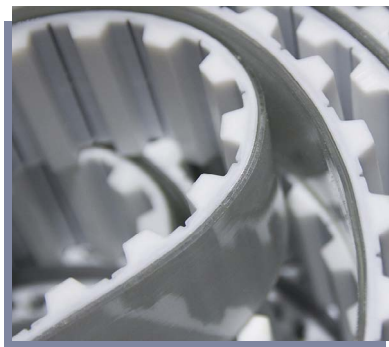

FDA-approved coatings are safe for food and pharma contact.

Les revêtements appliqués aux courroies synchrones améliorent les performances et la sécurité des systèmes de transport industriel.

Les revêtements certifiés FDA sont adaptés au contact direct avec les produits alimentaires et pharmaceutiques.

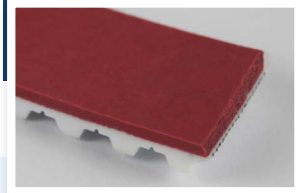

Los recubrimientos en correas planas y sincrónicas mejoran el rendimiento y la seguridad en sistemas de transporte industrial.

Los recubrimientos fabricados con homologación FDA son aptos para el contacto directo con productos alimentarios y farmacéuticos.
